SUPRAJA K

FRONT-END DEVELOPER | REACT.JS | NEXT.JS | JAVASCRIPT | TYPESCRIPT

Bangalore, Karnataka | +91 7259319829 | suprajak97@gmail.com| LinkedIn: supraja-krishnaraj| GitHub: suprajak97

PROFESSIONAL SUMMARY

Front-End Developer with 5+ years of experience building responsive enterprise web experiences using React.js, Angular, JavaScript, TypeScript, HTML5, CSS3 and Contentstack CMS. Delivered and maintained 500+ healthcare web pages for Johnson & Johnson, achieving a 97% individual First Time Right rate across initial QA reviews. Experienced in reusable UI components, REST API integration, responsive implementation, accessibility, testing, debugging, performance audits, CMS migration and deployment workflows. Recently developed a Next.js application independently, applying App Router, Server Components, dynamic routing and server-side data processing.

TECHNICAL SKILLS

Front-End: React.js, Next.js, Angular, JavaScript ES6+, TypeScript, HTML5, CSS3, SASS/SCSS

React / Next.js: Functional Components, React Hooks (useState, useEffect), Component-Level State, Reusable Components, App Router, Server Components, Server-Side Rendering, Dynamic Routing, Suspense

UI / Quality: Responsive Web Design, Bootstrap 5, Tailwind CSS, WCAG Accessibility, Unit Testing, Integration Testing, Lighthouse Audits, Core Web Vitals Optimization, Cross Browser Debugging

API / CMS / Data: REST APIs, Fetch API, Postman, Contentstack CMS, Drupal, WordPress, FormAssembly, JSON, SQLite

Tools / Delivery: Git, GitHub, Jenkins, Webpack, Babel, NPM, Vercel, VS Code, Chrome DevTools, JIRA, Redmine, Agile/Scrum

PROFESSIONAL EXPERIENCE

Web Developer / Backup Lead | **Indegene Private Limited** | Bangalore, Karnataka | Mar 2021 – Nov 2025

- Developed and maintained 500+ healthcare web pages for Johnson & Johnson across global markets, including landing pages, registration forms, e-Event pages, website updates and change requests using React.js and Contentstack CMS.
- Maintained a 97% individual First Time Right (FTR) rate across 500+ pages, measured by initial QA acceptance without corrections or rework.
- Independently handled hands-on development across 6–7 projects, including UI implementation, responsive layouts, unit testing, QA submissions, defect resolution and final client delivery.
- Resolved QA-reported UI and cross-device layout issues; supported front-end performance optimization, accessibility requirements and consistent website functionality.
- Contributed to development and maintenance for the Benelux market, collaborating with design teams, project managers and team leads to support quality and timely delivery.
- During primary lead absence, served as Backup Lead for a 6–8 members team: coordinated task/resource allocation, reviewed deliverables, facilitated Daily Scrum Meetings and managed dependencies and client escalations with PMs and AMs.
- As Backup Lead, continued hands-on development across 1–2 projects and conducted daily asset audits across 6–8 projects (up to 10 during peak periods); owned implementation of Johnson & Johnson website rebranding updates.
- Delivered website development for the Central Europe and Baltic pilot, adhering to coding standards, quality and performance requirements; the successful pilot supported the subsequent regional Content Master engagement.

Junior Web Developer (Contract) | **Software Pundits (India) Private Limited** | Bangalore, Karnataka | Aug 2020 – Feb 2021

- Developed custom HTML emails, landing pages and websites for Amgen client projects, implementing front-end requirements and UI specifications.
- Transitioned to Johnson & Johnson account projects, developing and maintaining web pages and supporting quality across deliverables.
- Supported Drupal-to-Contentstack CMS migration through content authoring and implementation in Contentstack; used Git for source control and collaboration.
- Implemented UI updates, resolved website issues and supported deployment and hosting activities during project handoffs.

Front-End Developer Intern | **Simplyfi Softech Private Limited** | Bangalore, Karnataka | Dec 2019 – Apr 2020

- Developed the company website and landing pages using Angular and React; contributed to dashboard module development.
- Integrated APIs to retrieve and display dynamic data and implemented UI layouts and front-end functionality.
- Used Git for source control, code tracking and development collaboration.

PERSONAL PROJECTS

PrintForge – 3D Printing Model Discovery Platform | *Next.js, React, TypeScript, HTML5, CSS3, SQLite, JSON, Vercel*

- Independently developed a responsive model-discovery application with reusable React components, landing page and dynamic listings for model names, descriptions, categories and popularity.
- Implemented keyword search, category filtering, sorting (A–Z, popularity and recently added), pagination and URL query parameter handling with server-side data processing.
- Used Next.js App Router and Server Components for server-rendered pages; built dynamic model/category routes, loading states, Suspense, error handling, 404 handling and invalid-page redirects.
- Initially integrated SQLite with model/category tables, database access functions and seed scripts; independently refactored to JSON-based data access to address Vercel serverless deployment compatibility and filesystem persistence limitations.
- Deployed the application on Vercel. Core live features include search, filtering, sorting, pagination, dynamic routing and loading states.

Music Mood Visualizer | *React 18, JavaScript, HTML5, CSS3, Spotify Web API, Framer Motion, Vite*

- Developed an interactive music visualization application integrating Spotify OAuth and Spotify Web API to retrieve currently playing track information and audio features.
- Implemented mood classification using energy and valence values (Happy, Sad, Angry and Chill), with track history, mood analytics and manual mood override.
- Created animated backgrounds, dynamic visual effects and mood-based colour themes using Framer Motion; applied React Hooks and asynchronous API data fetching.

Travel Journal | *React, JavaScript, HTML5, CSS3*

- Independently designed and developed a React application from a Figma design, using functional components, React Hooks and reusable components.
- Implemented responsive UI and interactive front-end functionality, following WCAG 2.2 AA accessibility guidelines.

Tensor Cassini – Movie Browser | *React, JavaScript, HTML5, CSS3, TMDB API*

- Built a dynamic movie browser powered by the TMDB API, using API-based data fetching to display movie information through an interactive interface.

Citizens Bank – Responsive Web Page | *HTML5, SCSS*

- Converted a PSD design into a responsive web page, implementing page structure, styling and layouts across screen sizes.

CAREER DEVELOPMENT & TECHNICAL UPSKILLING

Independent Upskilling & Personal Development | Nov 2025 – Present

- Following the end of employment on 3 November 2025, took a career break for health reasons; after recovery, focused on technical refresh, self-learning and independent front-end projects.
- Strengthened React.js, JavaScript and Next.js through practical exercises and coding challenges; completed Learn Next.js through Scrimba in October 2026.
- Expanded learning in web accessibility, AI-assisted development, chatbot development and cloud fundamentals through the courses listed below.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Learn Next.js – Scrimba | Oct 2026
- AWS Cloud Practitioner Essentials – AWS | Aug 2026
- Introduction to Accessibility; Web Accessibility Principles and Guidelines – Microsoft | Jun 2026
- Introduction to Agent Skills – Anthropic | Apr 2026
- Introduction to Subagents – Anthropic | Apr 2026
- Claude Code in Action – Anthropic | Mar 2026
- Chatbot & Smart Assistant Development – NASSCOM Foundation | Mar 2026
- Yuva AI for All – NASSCOM Foundation | Mar 2026
- Generative AI & Prompt Engineering – Indegene | Aug 2025

EDUCATION

Bachelor of Information Science & Engineering | Srinivas Institute of Technology, Mangalore, Karnataka | Jul 2015 – Jul 2019

PROJECT & PORTFOLIO
